Spiral Hydraulic Hose

NRP-Jones has developed an agreement with Rapisarda, a well known Italian hose manufacturer, for the supply of 100R12, 100R13 and 100R15 spiral hydraulic hose manufactured to SAE specifications. This new product line provides you with a price competitive option when selecting high pressure hydraulic hose. High impulse 100R12, 100R13 and 100R15 manufactured by Caterpillar to significantly exceed SAE design requirements will continue to be available giving you a choice between better and best!

1W Spiral Fittings

minimum.

NRP-Jones has introduced the 1W series a truly unique "one of kind" high pressure spiral hose fitting...one fitting used for both four and six spiral hose! This one piece design is available in all popular configurations through two inch. It is non-skive for use on 100R12 hose and requires an external only skive when applied to 100R13. The 1W Series provides you with a competitive high performance fitting that keeps your inventory to an absolute

ORFS Adapters

O-Ring face seal adapters have been added to the NRP-Jones line of adapters.
